

Name: *Jimmy Gaspard Jean*

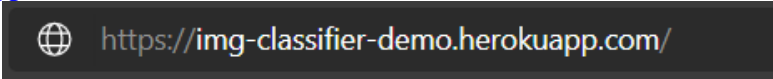

Internship Batch: *LISUM04*

Submission date: 2021-10-30

Submitted to: [DataGlacier-internship/lisum04-w5-Cloud-API at master · jimmygjean/DataGlacier-internship \(github.com\)](https://github.com/jimmygjean/DataGlacier-internship)

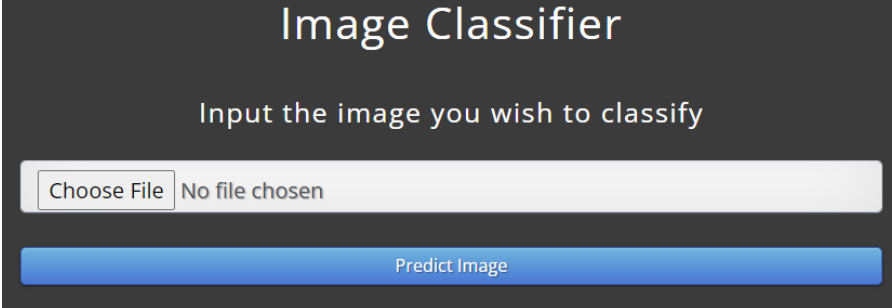

## Cloud & API Deployment

1. The model can be accessed on the internet through this link: <https://img-classifier-demo.herokuapp.com/>.

 <https://img-classifier-demo.herokuapp.com/>

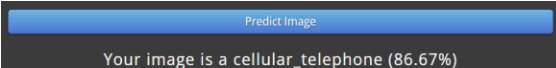

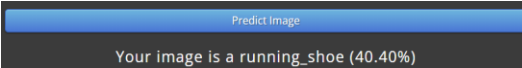

2. On the main page, the user is provided with an interface where he/she can upload an image.

3. The user might for example choose to upload a picture of this car or of this dog:

4. After submission, a deep learning model processes the image and makes a prediction of what the image could be (a MobileNet model was used). The result is then displayed to the user.

Feel free to interact with the interface online. As an extra, the “Build Log” during deployment to Heroku is provided below. Codes are also available on GitHub.

```

-----> Building on the Heroku-20 stack
-----> Using buildpack: heroku/python
-----> Python app detected
-----> Using Python version specified in runtime.txt
!     Python has released a security update! Please consider upgrading to python-3.8.12
      Learn More: https://devcenter.heroku.com/articles/python-runtimes
-----> Requirements file has been changed, clearing cached dependencies
-----> Installing python-3.8.8
-----> Installing pip 20.2.4, setuptools 57.5.0 and wheel 0.37.0
-----> Installing SQLite3
-----> Installing requirements with pip
